Common Criteria Protection Profile information:

PP Identification: IEEE Std 2600.4-2010

PP Registration: Not registered at the time of publication

Version: 1.0

Date: December 2009

Author: Hardcopy Device and System Security Working Group

Sponsor: IEEE Computer Society Information Assurance (C/IA) Committee

Common Criteria Scheme: Not validated at the time of publication

Common Criteria Testing Lab: atsec information security

Common Criteria conformance: Version 3.1, Release 2, Part 2 extended and Part 3 conformant

Assurance level: EAL 1

Low Assurance Level

© 2010 IEEE. Copyright claimed in Clauses 10, 11, and 13, exclusive of text from Common Criteria Part 2, Version 3.1, and in Annexes A and B, exclusive of text from Common Criteria Part 1, Version 3.1.

**Abstract:** A Protection Profile for Hardcopy Devices in a small, private information processing environment is discussed in this standard in which most elements of security are provided by the physical environment, but basic network security is needed to protect the device and its network from misuse from outside of the environment. Small offices and home offices are typical applications of this environment. This environment will be known as “Operational Environment D.”

**Keywords:** all-in-one, Common Criteria, copier, disk overwrite, document, document server, document storage and retrieval, facsimile, fax, hardcopy, ISO/IEC 15408, multifunction device (MFD), multifunction product (MFP), network, network interface, nonvolatile storage, office, paper, printer, Protection Profile, residual data, scanner, security target, shared communications medium, temporary data

**IEEE Standards** documents are developed within the IEEE Societies and the Standards Coordinating Committees of the IEEE Standards Association (IEEE-SA) Standards Board. The IEEE develops its standards through a consensus development process, approved by the American National Standards Institute, which brings together volunteers representing varied viewpoints and interests to achieve the final product. Volunteers are not necessarily members of the Institute and serve without compensation. While the IEEE administers the process and establishes rules to promote fairness in the consensus development process, the IEEE does not independently evaluate, test, or verify the accuracy of any of the information or the soundness of any judgments contained in its standards.

Use of an IEEE Standard is wholly voluntary. The IEEE disclaims liability for any personal injury, property or other damage, of any nature whatsoever, whether special, indirect, consequential, or compensatory, directly or indirectly resulting from the publication, use of, or reliance upon this, or any other IEEE Standard document.

The IEEE does not warrant or represent the accuracy or content of the material contained herein, and expressly disclaims any express or implied warranty, including any implied warranty of merchantability or fitness for a specific purpose, or that the use of the material contained herein is free from patent infringement. IEEE Standards documents are supplied “**AS IS.**”

The existence of an IEEE Standard does not imply that there are no other ways to produce, test, measure, purchase, market, or provide other goods and services related to the scope of the IEEE Standard. Furthermore, the viewpoint expressed at the time a standard is approved and issued is subject to change brought about through developments in the state of the art and comments received from users of the standard. Every IEEE Standard is subjected to review at least every five years for revision or reaffirmation. When a document is more than five years old and has not been reaffirmed, it is reasonable to conclude that its contents, although still of some value, do not wholly reflect the present state of the art. Users are cautioned to check to determine that they have the latest edition of any IEEE Standard.

In publishing and making this document available, the IEEE is not suggesting or rendering professional or other services for, or on behalf of, any person or entity. Nor is the IEEE undertaking to perform any duty owed by any other person or entity to another. Any person utilizing this, and any other IEEE Standards document, should rely upon his or her independent judgment in the exercise of reasonable care in any given circumstances or, as appropriate, seek the advice of a competent professional in determining the appropriateness of a given IEEE standard.

Interpretations: Occasionally questions may arise regarding the meaning of portions of standards as they relate to specific applications. When the need for interpretations is brought to the attention of IEEE, the Institute will initiate action to prepare appropriate responses. Since IEEE Standards represent a consensus of concerned interests, it is important to ensure that any interpretation has also received the concurrence of a balance of interests. For this reason, IEEE and the members of its societies and Standards Coordinating Committees are not able to provide an instant response to interpretation requests except in those cases where the matter has previously received formal consideration. A statement, written or oral, that is not processed in accordance with the IEEE-SA Standards Board Operations Manual shall not be considered the official position of IEEE or any of its committees and shall not be considered to be, nor be relied upon as, a formal interpretation of the IEEE. At lectures, symposia, seminars, or educational courses, an individual presenting information on IEEE standards shall make it clear that his or her views should be considered the personal views of that individual rather than the formal position, explanation, or interpretation of the IEEE.

Comments for revision of IEEE Standards are welcome from any interested party, regardless of membership affiliation with IEEE. Suggestions for changes in documents should be in the form of a proposed change of text, together with appropriate supporting comments. Comments on standards and requests for interpretations should be submitted to the following address:

Secretary, IEEE-SA Standards Board  
445 Hoes Lane  
Piscataway, NJ 08854  
USA

Authorization to photocopy portions of any individual standard for internal or personal use is granted by The Institute of Electrical and Electronics Engineers, Inc., provided that the appropriate fee is paid to Copyright Clearance Center. To arrange for payment of licensing fee, please contact Copyright Clearance Center, Customer Service, 222 Rosewood Drive, Danvers, MA 01923 USA; +1 978 750 8400. Permission to photocopy portions of any individual standard for educational classroom use can also be obtained through the Copyright Clearance Center.

## Introduction

This introduction is not part of IEEE Std 2600.4™-2010, IEEE Standard Protection Profile for Hardcopy Devices in IEEE Std 2600™-2008 Operational Environment D.

This document is a standard for a Common Criteria Protection Profile for Hardcopy Devices. It is intended to be used by manufacturers of Hardcopy Devices to write conformant Security Target documents for Common Criteria certification of their hardcopy device products. It may also be used to write conformant Protection Profiles for Hardcopy Devices.

This standard is related to IEEE Std 2600™-2008. IEEE Std 2600-2008 is a more general standard for hardcopy device security and contains a large amount of content that is beyond the scope of or otherwise inappropriate for a Common Criteria Protection Profile. The two standards are related by way of the compliance clause of IEEE Std 2600-2008. With some well-defined exceptions, 8.1.4 of IEEE Std 2600-2008 contains Security Objectives that are technically consistent with the Security Objectives (APE\_OBJ) clause of this document. The exceptions to this consistency between IEEE Std 2600 and this standard are distinguished by the use of the word “should” instead of “shall” in IEEE Std 2600-2008 and the absence of those objectives in this standard.

## For more information

Further information, including the status and updates of this standard can be found on the Internet at <http://grouper.ieee.org/groups/2600/>.

Comments or questions regarding this document should be directed to [stds-2600-4@ieee.org](mailto:stds-2600-4@ieee.org). The comments should include the title of the document, the page, section, and paragraph numbers, and a detailed comment or recommendation.

## Notice to users

## Laws and regulations

Users of these documents should consult all applicable laws and regulations. Compliance with the provisions of this standard does not imply compliance to any applicable regulatory requirements. Implementers of the standard are responsible for observing or referring to the applicable regulatory requirements. IEEE does not, by the publication of its standards, intend to urge action that is not in compliance with applicable laws, and these documents may not be construed as doing so.

## Copyrights

This document is copyrighted by the IEEE. It is made available for a wide variety of both public and private uses. These include both use, by reference, in laws and regulations, and use in private self-regulation, standardization, and the promotion of engineering practices and methods. By making this document available for use and adoption by public authorities and private users, the IEEE does not waive any rights in copyright to this document.

## Updating of IEEE documents

Users of IEEE standards should be aware that these documents may be superseded at any time by the issuance of new editions or may be amended from time to time through the issuance of amendments, corrigenda, or errata. An official IEEE document at any point in time consists of the current edition of the

document together with any amendments, corrigenda, or errata then in effect. In order to determine whether a given document is the current edition and whether it has been amended through the issuance of amendments, corrigenda, or errata, visit the IEEE Standards Association Web site at <http://ieeexplore.ieee.org/xpl/standards.jsp>, or contact the IEEE at the address listed previously.

For more information about the IEEE Standards Association or the IEEE standards development process, visit the IEEE-SA website at <http://standards.ieee.org>.

## **Errata**

Errata, if any, for this and all other standards can be accessed at the following URL: <http://standards.ieee.org/reading/ieee/updates/errata/index.html>. Users are encouraged to check this URL for errata periodically.

## **Interpretations**

Current interpretations can be accessed at the following URL: <http://standards.ieee.org/reading/ieee/interp/index.html>.

## **Patents**

Attention is called to the possibility that implementation of this standard may require use of subject matter covered by patent rights. By publication of this standard, no position is taken with respect to the existence or validity of any patent rights in connection therewith. The IEEE shall not be responsible for identifying patents or patent applications for which a license may be required to implement an IEEE standard or for conducting inquiries into the legal validity or scope of those patents that are brought to its attention.

## Participants

At the time this standard was completed, the Hardcopy Device and System Security Working Group had the following membership:

**Don Wright, Chair**                      **Lee Farrell, Vice Chair**  
**Brian Smithson, Secretary and Lead Editor**  
**Carmen Aubry, Nancy Chen, Ron Nevo, and Alan Sukert, Editors**

Shah Bhatti  
Peter Cybuck  
Nick Del Re  
Satoshi Fujitani  
Tom Haapanen  
Akihiko Iwasaki

Harry Lewis  
Takanori Masui  
Yusuke Ohta  
Ken Ota  
Glen Petrie  
Amir Shahindoust

Jerry Thrasher  
Hiroki Uchiyama  
Shigeru Ueda  
Brian Volkoff  
Bill Wagner  
Sameer Yami

The following members of the balloting committee voted on this standard. Balloters may have voted for approval, disapproval, or abstention.

Carmen Aubry  
Matthew Ball  
Ying Chen  
Danila Chernestov  
Keith Chow  
Paul Croll  
Geoffrey Darnton  
Nick Del Re  
Russell Dietz

Lee Farrell  
Randall Groves  
Mark Henley  
Werner Hoelzl  
Raj Jain  
Piotr Karocki  
G. Luri  
Edward McCall  
Michael S. Newman

Stephen Schwarm  
Steven Smith  
Brian Smithson  
Thomas Starai  
Jerry Thrasher  
Thomas Tullia  
Paul Work  
Forrest Wright  
Sameer Yami

## Acknowledgments

The following companies have agreed to make financial contributions to underwrite the cost of Common Criteria certification of some or all of the IEEE Std 2600-series Protection Profiles:

Canon  
Fuji-Xerox  
HP  
InfoPrint Solutions  
Konica Minolta

Kyocera-Mita  
Lexmark  
Océ  
Oki Data

Ricoh  
Samsung  
Sharp  
Toshiba  
Xerox

When the IEEE-SA Standards Board approved this standard on 2 February 2010, it had the following membership:

**Robert M. Grow**, *Chair*  
**Tom A. Prevost**, *Vice Chair*  
**Steve M. Mills**, *Past Chair*  
**Judith Gorman**, *Secretary*

John Barr  
Karen Bartelson  
Victor Berman  
Ted Burse  
Richard DeBlasio  
Andrew Drozd  
Mark Epstein

Alexander Gelman  
James Hughes  
Richard H. Hulett  
Young Kyun Kim  
Joseph L. Koepfing\*  
John Kulick  
David J. Law

Ted Olsen  
Glenn Parsons  
Ronald C. Petersen  
Narayanan Ramachandran  
Jon Walter Rosdahl  
Sam Sciacca  
Howard L. Wolfman

\*Member Emeritus

Also included are the following nonvoting IEEE-SA Standards Board liaisons:

Satish K. Aggarwal, *NRC Representative*

Michael Janezic, *NIST Representative*

Don Messina  
*IEEE Standards Program Manager, Document Development*

Michael D. Kipness  
*IEEE Standards Program Manager, Technical Program Development*

# IEEE Standard Protection Profile for Hardcopy Devices in IEEE Std 2600™-2008 Operational Environment D

*IMPORTANT NOTICE: This standard is not intended to ensure safety, security, health, or environmental protection in all circumstances. Implementers of the standard are responsible for determining appropriate safety, security, environmental, and health practices or regulatory requirements.*

*This IEEE document is made available for use subject to important notices and legal disclaimers. These notices and disclaimers appear in all publications containing this document and may be found under the heading “Important Notice” or “Important Notices and Disclaimers Concerning IEEE Documents.” They can also be obtained on request from IEEE or viewed at <http://standards.ieee.org/IPR/disclaimers.html>.*

## 1. Overview

### 1.1 Scope

This standard is for a Protection Profile for Hardcopy Devices in a small, private information processing environment in which most elements of security are provided by the physical environment, but basic network security is needed to protect the device and its network from misuse from outside of the environment. Small offices and home offices are typical applications of this environment. This environment will be known as “Operational Environment D.”

### 1.2 Purpose

The purpose of this standard is to create a security Protection Profile (PP) for Hardcopy Devices in Operational Environment D as defined in IEEE Std 2600™-2008.<sup>1</sup>

### 1.3 Application notes

Application notes are provided where they may contribute to the reader’s understanding. These notes, while not part of the formal statement of this Protection Profile, are included as an acknowledgment of the diverse uses of this document and are intended to provide guidance to its users.
