PREFACE

History

The State of Florida first mandated statewide building codes during the 1970s at the beginning of the modern construction boom. The first law required all municipalities and counties to adopt and enforce one of the four state-recognized model codes known as the “state minimum building codes.” During the early 1990s a series of natural disasters, together with the increasing complexity of building construction regulation in vastly changed markets, led to a comprehensive review of the state building code system. The study revealed that building code adoption and enforcement was inconsistent throughout the state and those local codes thought to be the strongest proved inadequate when tested by major hurricane events. The consequences of the building codes system failure were devastation to lives and economies and a statewide property insurance crisis. The response was a reform of the state building construction regulatory system that placed emphasis on uniformity and accountability.

The 1998 Florida Legislature amended Chapter 553, *Florida Statutes* (FS), Building Construction Standards, to create a single state building code that is enforced by local governments. As of March 1, 2002, the *Florida Building Code*, which is developed and maintained by the Florida Building Commission, supersedes all local building codes. The *Florida Building Code* is updated every three years and may be amended annually to incorporate interpretations and clarifications.

Scope

The *Florida Building Code* is based on national model building codes and national consensus standards which are amended where necessary for Florida’s specific needs. The code incorporates all building construction-related regulations for public and private buildings in the State of Florida other than those specifically exempted by Section 553.73, *Florida Statutes*. It has been harmonized with the *Florida Fire Prevention Code*, which is developed and maintained by the Department of Financial Services, Office of the State Fire Marshal, to establish unified and consistent standards.

The base codes for the *Florida Building Code*, 6th Edition (2017) include: the 2015 editions of the *International Building Code*®; the *International Plumbing Code*®; the *International Mechanical Code*®; the *International Fuel Gas Code*®; the *International Residential Code*®; the *International Existing Building Code*®; the *International Energy Conservation Code*®; the *National Electrical Code*, 2014 edition; or substantive criteria from ASHRAE Standard 90.1-2013. State and local codes adopted and incorporated into the code include the *Florida Building Code, Accessibility*, and special hurricane protection standards for the High-Velocity Hurricane Zone.

The code is composed of nine main volumes: the *Florida Building Code, Building*, which also includes state regulations for licensed facilities; the *Florida Building Code, Plumbing*; the *Florida Building Code, Mechanical*; the *Florida Building Code, Fuel Gas*; the *Florida Building Code, Existing Building*; the *Florida Building Code, Residential*; the *Florida Building Code, Energy Conservation*; the *Florida Building Code, Accessibility* and the *Florida Building Code, Test Protocols for High-Velocity Hurricane Zones*. Chapter 27 of the *Florida Building Code, Building*, adopts the *National Electrical Code*, NFPA 70, by reference.

Under certain strictly defined conditions, local governments may amend requirements to be more stringent than the code. All local amendments to the *Florida Building Code* must be adopted by local ordinance and reported to the Florida Building Commission then posted on www.florida-building.org in Legislative format for a month before being enforced. Local amendments to the *Florida Building Code* and the *Florida Fire Prevention Code* may be obtained from the Florida Building Commission web site, or from the Florida Department of Business and Professional Regulation or the Florida Department of Financial Services, Office of the State Fire Marshal, respectively.

Adoption and Maintenance

The *Florida Building Code* is adopted and updated with new editions triennially by the Florida Building Commission. It is amended annually to incorporate interpretations, clarifications and to update standards. Minimum requirements for permitting, plans review and inspections are established by the code, and local jurisdictions may adopt additional administrative requirements that are more stringent. Local technical amendments are subject to strict criteria established by Section 553.73, FS. They are subject to Commission review and adoption into the code or repeal when the code is updated triennially and are subject to appeal to the Commission according to the procedures established by Section 553.73, FS.

Eleven Technical Advisory Committees (TACs), which are constituted consistent with American National Standards Institute (ANSI) Guidelines, review proposed code changes and clarifications of the code and make recommendations to the Commission. These TACs whose membership is constituted consistent with American National Standards Institute (ANSI) Guidelines include: Accessibility; Joint Building Fire (a joint committee of the Commission and the State Fire Marshal); Building Structural; Code Administration/ Enforcement; Electrical; Energy; Mechanical; Plumbing and Fuel Gas; Roofing; Swimming Pool; and Special Occupancy (state agency construction and facility licensing regulations).

The Commission may only issue official code clarifications using procedures of Chapter 120, *Florida Statutes*. To obtain such a clarification, a request for a Declaratory Statement (DEC) must be made to the Florida Building Commission in a manner that establishes a clear set of facts and circumstances and identifies the section of the code in question. Requests are analyzed by staff, reviewed by the appropriate Technical Advisory Committee, and sent to the Florida Building Commission for action. These interpretations establish precedents for situations having similar facts and circumstances and are typically incorporated into the code in the next code amendment cycle. Non-binding opinions are available from the Building Officials Association of Florida's web site (www.BOAF.net) and a Binding Opinion process is available online at www.floridabuilding.org.

Code Development Committee Responsibilities

In each code development cycle, proposed changes to the code are considered at the Committee Action Hearings by the applicable International Code Development Committee as follows:

[RB] = IRC—Building Code Development Committee

[RE] = Residential Energy Code Development Committee

[RMP] = IRC—Mechanical/Plumbing Code Development Committee

The [RE] committee is also responsible for the IECC—Residential Provisions.

Marginal Markings

Solid vertical lines in the margins within the body of the code indicate a technical change from the requirements of the 2012 edition. Deletion indicators in the form of an arrow (➡) are provided in the margin where an entire section, paragraph, exception or table has been deleted or an item in a list of items or a table has been deleted.

A single asterisk [*] placed in the margin indicates that text or a table has been relocated within the code. A double asterisk [**] placed in the margin indicates that the text or table immediately following it has been relocated there from elsewhere in the code.

Dotted vertical lines in the margins within the body of the code indicate a change from the requirements of the base codes to the *Florida Building Code, Residential*, 6th Edition (2017) effective December 31, 2017.

Sections deleted from the base code are designated “Reserved” in order to maintain the structure of the base code.

Italicized Terms

Selected terms set forth in Chapter 2, Definitions, are italicized where they appear in code text. Such terms are not italicized where the definition set forth in Chapter 2 does not impart the intended meaning in the use of the term. The terms selected have definitions that the user should read carefully to better understand the code.

Acknowledgments

The *Florida Building Code* is produced through the efforts and contributions of building designers, contractors, product manufacturers, regulators and other interested parties who participate in the Florida Building Commission’s consensus processes, Commission staff and the participants in the national model code development processes.

E4207 Storable Swimming Pools,
Storable Spas, and Storable Hot Tubs 722
E4208 Spas and Hot Tubs 723
E4209 Hydromassage Bathtubs 723

CHAPTER 43 CLASS 2 REMOTE-CONTROL, SIGNALING AND POWER-LIMITED CIRCUITS 725

Section
E4301 General 725
E4302 Power Sources 725
E4303 Wiring Methods 725
E4304 Installation Requirements 726

CHAPTER 44 HIGH-VELOCITY HURRICANE ZONES 727

Section
4401 High-Velocity Hurricane Zones—Exterior Wall
Covering 727

4402	High-Velocity Hurricane Zones—Roof Assemblies and Rooftop Structures	727	APPENDIX E FLORIDA STANDARD FOR MITIGATION OF RADON IN EXISTING BUILDINGS	797
4403	High-Velocity Hurricane Zones—General.	727		
4404	High-Velocity Hurricane Zones—Foundations and Retaining Walls	727	APPENDIX F FLORIDA STANDARD FOR PASSIVE RADON-RESISTANT NEW RESIDENTIAL BUILDING CONSTRUCTION	805
4405	High-Velocity Hurricane Zones—Concrete.	727		
4406	High-Velocity Hurricane Zones—Light Metal Alloys	727	APPENDIX G PIPING STANDARDS FOR VARIOUS APPLICATIONS.	811
4407	High-Velocity Hurricane Zones—Masonry.	727		
4408	High-Velocity Hurricane Zones—Steel	727	APPENDIX H PATIO COVERS	815
4409	High-Velocity Hurricane Zones—Wood	727	Section	
4410	High-Velocity Hurricane Zones—Glass and Glazing	727	AH101 General.	815
4411	High-Velocity Hurricane Zones—Gypsum Board and Plaster	727	AH102 Definition.	815
4412	High-Velocity Hurricane Zones—Plastics.	727	AH103 Exterior Walls and Openings.	815
	CHAPTER 45 PRIVATE SWIMMING POOLS.	729	AH104 Height.	815
	Section		AH105 Structural Provisions	815
	E4501 General	729	AH106 Special Provisions for Aluminum Screen Enclosures in Hurricane-prone Regions	815
	Part IX—Referenced Standards	737		
	CHAPTER 46 REFERENCED STANDARDS	737	APPENDIX I PRIVATE SEWAGE DISPOSAL	819
	APPENDIX A SIZING AND CAPACITIES OF GAS PIPING	767	Section	
	APPENDIX B SIZING OF VENTING SYSTEMS SERVING APPLIANCES EQUIPPED WITH DRAFT HOODS, CATEGORY I APPLIANCES, AND APPLIANCES LISTED FOR USE WITH TYPE B VENTS	779	AI101 General.	819
	APPENDIX C EXIT TERMINALS OF MECHANICAL DRAFT AND DIRECT-VENT VENTING SYSTEMS	789	APPENDIX J EXISTING BUILDINGS AND STRUCTURES	821
	APPENDIX D RECOMMENDED PROCEDURE FOR SAFETY INSPECTION OF AN EXISTING APPLIANCE INSTALLATION	791	Section	
			AJ101 Purpose and Intent	821
			AJ102 Compliance	821
			AJ103 Preliminary Meeting	822
			AJ104 Evaluation of an Existing Building	822
			AJ105 Permit.	822
			AJ201 Definitions	822
			AJ301 Repairs	823
			AJ401 Renovations	823
			AJ501 Alterations	823
			AJ601 Reconstruction	824
			APPENDIX K SOUND TRANSMISSION.	827
			Section	
			AK101 General.	827
			AK102 Air-borne Sound.	827

TABLE OF CONTENTS

AK103 Structural-borne Sound 827
 AK104 Referenced Standards 827

APPENDIX L PERMIT FEES 829

APPENDIX M HOME DAY CARE—R-3 OCCUPANCY 831

Section
 AM101 General 831
 AM102 Definition 831
 AM103 Means of Egress 831
 AM104 Smoke Detection 832

APPENDIX N VENTING METHODS 833

APPENDIX O AUTOMATIC VEHICULAR GATES 839

Section
 AO101 General 839
 AO102 Definition 839
 AO103 Automatic Vehicular Gates 839

APPENDIX P SIZING OF WATER PIPING SYSTEM 841

Section
 AP101 General 841
 AP102 Information Required 841
 AP103 Selection of Pipe Size 841
 AP201 Selection of Pipe Size 858

APPENDIX Q RESERVED 861

APPENDIX R LIGHT STRAW-CLAY CONSTRUCTION 863

Section
 AR101 General 863
 AR102 Definitions 863
 AR103 Nonbearing Light Straw-Clay Construction 863

AR104 Thermal Insulation 864
 AR105 Referenced Standard 864

APPENDIX S STRAWBALE CONSTRUCTION 865

Section
 AS101 General 865
 AS102 Definitions 865
 AS103 Bales 865
 AS104 Finishes 866
 AS105 Strawbale Walls—General 867
 AS106 Strawbale Walls—Structural 869
 AS107 Fire Resistance 872
 AS108 Thermal Insulation 873
 AS109 Referenced Standards 873

APPENDIX T RECOMMENDED PROCEDURE FOR WORST-CASE TESTING OF ATMOSPHERIC VENTING SYSTEMS UNDER N1102.4 OR N1105 CONDITIONS $\leq 5ACH_{50}$ 875

Section
 T101 Scope 875
 T202 General Definitions 875
 T301 Testing Procedure 875

APPENDIX U SOLAR-READY PROVISIONS—DETACHED ONE- AND TWO-FAMILY DWELLINGS, MULTIPLE SINGLE-FAMILY DWELLINGS (TOWNHOUSES) 877

Section
 U101 Scope 877
 U102 General Definition 877
 U103 Solar-ready Zone 877

INDEX 879
