

Australian/New Zealand Standard™

**Approval and test specification—Plugs  
and socket-outlets**

## **AS/NZS 3112:2017**

This Joint Australian/New Zealand Standard was prepared by Joint Technical Committee EL-004, Electrical Accessories. It was approved on behalf of the Council of Standards Australia on 21 July 2017 and by the New Zealand Standards Approval Board on 2 August 2017.

This Standard was published on 24 August 2017.

---

The following are represented on Committee EL-004:

Association of Accredited Certification Bodies  
Australian Chamber of Commerce and Industry  
Australian Industry Group  
Consumer Electronics Suppliers Association  
Consumers Federation of Australia  
Electrical Compliance Testing Association  
Electrical Regulatory Authorities Council  
Engineers Australia  
International Accreditation New Zealand  
National Electrical and Communications Association  
New Zealand Manufacturers and Exporters Association  
NSW Fair Trading  
Plastics Industry Pipe Association of Australia  
Worksafe New Zealand

### **Keeping Standards up-to-date**

Standards are living documents which reflect progress in science, technology and systems. To maintain their currency, all Standards are periodically reviewed, and new editions are published. Between editions, amendments may be issued. Standards may also be withdrawn. It is important that readers assure themselves they are using a current Standard, which should include any amendments which may have been published since the Standard was purchased.

Detailed information about joint Australian/New Zealand Standards can be found by visiting the Standards Web Shop at [www.saiglobal.com](http://www.saiglobal.com) or Standards New Zealand web site at [www.standards.govt.nz](http://www.standards.govt.nz) and looking up the relevant Standard in the on-line catalogue.

For more frequent listings or notification of revisions, amendments and withdrawals, Standards Australia and Standards New Zealand offer a number of update options. For information about these services, users should contact their respective national Standards organization.

We also welcome suggestions for improvement in our Standards, and especially encourage readers to notify us immediately of any apparent inaccuracies or ambiguities. Please address your comments to the Chief Executive of Standards Australia or the New Zealand Standards Executive at the address shown on the back cover.

## PREFACE

This Standard was prepared by the Joint Standards Australia/Standards New Zealand Committee EL-004, Electrical Accessories to supersede AS/NZS 3112:2011.

Regulatory Authorities have accepted a transition period of 18 months for the requirements of particular clauses. In Clause 3.1.2, new requirements have been added. In Paragraphs J2.3, J4.3.1 and J4.8.2 through to J4.8.4.1 of Appendix J, new and pre-existing requirements are included. During the transition period the new requirements as detailed above may be applied in lieu of the pre-existing requirements. All other parts of this Standard take effect from the date of publication. The 'new requirement' date of application (DOA) and the 'pre-existing' date of withdrawal (DOW), where relevant, are indicated by the marginal bar against the part affected.

The objective of this Standard is to provide the Australian and New Zealand electrical industry, including manufacturers, test laboratories and regulators, with requirements and test methods for plugs and socket-outlets.

This Standard is one of a series of approval and test specifications to be read in conjunction with AS/NZS 3100, *Approval and test specification—General requirements for electrical equipment*. The purpose of this series is to outline conditions which need to be met to secure approval for the sale and use of electrical equipment. Only safety matters and related conditions are covered.

The essential safety requirements in AS/NZS 3820, *Essential safety requirements for electrical equipment*, which could be applicable to plugs and socket-outlets, are covered by this Standard, taken in conjunction with any other relevant requirements affecting safety.

Major changes in this edition are in the following:

- (a) Clause 1.1      Scope. Updated and clarified.
- (b) Clause 2.8.1    Ratings and dimensions.
- (c) Clause 2.8.4    Dimensions of Figure 2.1.
- (d) Clause 2.13.3   High voltage test.
- (e) Clause 3.1.2    Construction of terminals.
- (f) Clause 3.10     Floor socket-outlets.
- (g) Clause 3.12     Shuttered socket-outlets.
- (h) Clause 3.14.1   Tests for socket-outlets.
- (i) Clause 3.14.3   High voltage test.
- (j) Figure 2.1.
- (k) Figure 2.11.
- (l) Figure 3.10.
- (m) Appendix J. Change the title and include integral or detachable plug portions of equipment for insertion into socket outlets requirements.

This Standard was revised to introduce the following technical and editorial changes:

- (i) Update referenced documents.
- (ii) Update and clarify the scope of the Standard.
- (iii) Update diagrams for clarity.
- (iv) Add new definition for insulation piercing terminal or connecting device.
- (v) Add a new Appendix K, Non-detachable parts test (normative).

Statements expressed in mandatory terms in notes to tables are deemed to be requirements of this Standard.

The term 'normative' has been used in this Standard to define the application of the appendix to which it applies. A 'normative' Appendix is an integral part of a Standard.

G	THREE-PIN TEST PLUG WITH FLAT AND ROUND PINS FOR THE FULL-INSERTION TEST AND THE FINGER TEST DURING NORMAL INSERTION TEST ..... 71
H	DIMENSIONS FOR PLUGS AND SOCKET-OUTLETS, IP-RATED, WITH THREADED RETAINING DEVICES ..... 72
I	PROTECTIVE DUMMY PLUGS..... 73
J	INTEGRAL OR DETACHABLE PLUG PORTIONS OF EQUIPMENT FOR INSERTION INTO SOCKET-OUTLETS..... 75
K	NON-DETACHABLE PARTS TEST ..... 81

## STANDARDS AUSTRALIA/STANDARDS NEW ZEALAND

**Australian/New Zealand Standard****Approval and test specification—Plugs and socket-outlets**

## SECTION 1 SCOPE AND GENERAL

**1.1 SCOPE**

This Standard specifies essential safety requirements for plugs and socket-outlets, as defined in Clause 1.4, intended for use at a rated voltage not exceeding 500 V and a rated current not exceeding 32 A for household or similar purposes. Requirements for extra low voltage plugs and socket-outlets are set out in Appendix E.

Plug and socket configurations listed in IEC 60083 other than Australian and New Zealand are excluded from this Standard, with the exception of travel adaptors covered in AS/NZS 3122 Appendix A.

This Standard does not provide requirements on the following:

- (a) Appliance couplers (see AS/NZS 60320.1).
- (b) Installation couplers (see AS/NZS 3131 or AS/NZS 61535).
- (c) Plugs, socket-outlets and couplers for general industrial applications (see AS/NZS 3123).
- (d) Plugs and socket-outlets for stationary appliances (see AS/NZS 3131).

**1.2 APPLICATION****1.2.1 General requirements of AS/NZS 3100**

This Standard shall be read in conjunction with AS/NZS 3100. The relevant provisions of AS/NZS 3100 shall apply to the construction of a plug or socket-outlet and the insulation and safeguarding of parts that primarily carry current.

**1.2.2 Specific requirements of this Standard**

A plug or socket-outlet, including a special purpose plug or socket-outlet, shall be deemed to comply with this Standard only if it satisfies all the applicable requirements and passes the applicable tests specified in this Standard.

For special purpose plugs and socket-outlets small deviations from the dimensions as specified in Figure 2.1, which give the impression of a standardized plug and socket-outlet and lead to confusion with standardized plugs and socket-outlets, are not allowed.

For protective dummy plugs, refer to Appendix I.

For integral or detachable plug portions of equipment for insertion into socket-outlets, refer to Appendix J.
